

JORDAN ALLEN

Senior Full-Stack Engineer | End-to-End Product Delivery

Houston, TX (Remote/Hybrid) · Jordan@goodlydevelopment.com · 530-215-9027 · <https://linkedin.com/in/jordan-allen-gd>

PROFESSIONAL SUMMARY

Senior full-stack engineer with 6+ years of experience building and modernizing software across healthcare, sales, e-commerce, fintech, and logistics. Strong at turning ambiguous requirements into shipped products, owning delivery across frontend, backend, data, and integrations, and becoming productive quickly in unfamiliar stacks. Best suited to high-trust environments where adaptability, practical execution, and product-minded engineering matter.

TECHNICAL SKILLS

Frontend: React, Next.js, Vue, Blazor Server, SwiftUI

Backend: Node.js, TypeScript, Express, C#, .NET, ASP.NET

Data / Infra: PostgreSQL, Prisma, SQLite, Fly.io

Platforms & Tools: AWS, Shopify, Twilio, OpenAI APIs, PDFKit, Git

EXPERIENCE

Goodly Development 2020 – Present

Software Consultant / Technical Lead

- Founded and operate a software consulting firm delivering technical leadership, architecture, and full-stack development across healthcare, sales, e-commerce, and construction.
- Designed and built an AI-powered iOS application delivering real-time insights to sales agents during live calls; shipped a fully functional prototype in 6 weeks using Swift, SwiftUI, Twilio, Node.js, TypeScript, and OpenAI APIs.
- Converted complex Excel-based catheter design logic into a full-stack Shopify subscription application in 6 weeks using React, Node.js, Prisma, PostgreSQL, and PDFKit.
- Architected and led modernization of legacy ASP.NET WebForms healthcare applications to modern .NET and Blazor Server, reducing deploy time by 60–70%, API latency by 35–45%, and production hotfixes by 40–50%.
- Served as Fractional CTO for a small insurance business, onboarding a new CRM, building custom lead-management software, and redesigning workflows that doubled team productivity.
- Optimized search algorithms for a client platform, improving search accuracy by 50% and contributing to doubling subscriber growth.

Zealot 2022 – 2023

Lead Developer

- Led engineering and project management for a subscription-based platform in a fully remote environment.
- Built and launched a subscription service that grew the customer base by 5x.
- Migrated the platform to a new hosting environment, resolving all stability issues and improving reliability by 40%.
- Designed and shipped an email subscription system that increased user response rates by 50%.

WeGive 2022 – 2023

Front-End Developer

- Built user-facing features for a fintech donation platform in collaboration with product and design teams.
- Overhauled financial data tables, increasing user engagement by 50% and reducing user confusion by 30%.
- Led a platform-wide bug-fixing initiative that improved stability by 30%.

Rewired.one 2021 – 2022

Software Engineer

- Delivered full-stack development across multiple client products in an agency environment.
- Led a crypto startup project end-to-end from requirements through deployment, delivering on time and within budget.
- Built key features for a music streaming platform that contributed to growth to 17,000 subscribers.

Veracitek 2020 – 2021

Software Developer

- Contributed to development and testing across logistics software and healthcare systems in an enterprise technology services environment.
- Built a client-facing healthcare website and deployed digital signage to a Linux server environment.

ADDITIONAL LEADERSHIP

Before software engineering, founded and directed a nonprofit operating base in Peru (YWAM, 2011–2019), recruiting and developing 100+ leaders, coordinating 80+ international teams, and managing cross-cultural operations, budgets, logistics, and multilingual training across cultures.

CERTIFICATIONS

- AWS Cloud Practitioner
